of Things*

Igor Skamperle: *Concept of Harmony in Cosmological  
Theories: From Plato to Kepler and Contemporary  
Approach*

*Discussion*

The titles of the proposed papers are not final. As usual, the translation from or into Slovene, Italian or English will be provided, if needed, especially for those taking part in the discussion. For better and easier understanding we would be grateful if the lecturers sent their papers (and preferably also the translations – shortened versions are also welcome) by e-mail in advance, so that we could provide photocopies.
